

## HIDECURVE Tricolor Tricolor artificial hedge

Artificial tricolour hedge with 38 rods/ml, 50% recycled. It offers an aesthetic and practical solution for delimiting your garden or terrace. Create an effective visual barrier while adding a touch of greenery and nature to your outdoor space.

## **Benefits**

Artificial hedge developed and manufactured by the Catral Group in our production plants. Thanks to the work carried out by the R&D department, we have created the first hedge with a realistic cut, mixing 3 different tones of sprigs, to imitate natural hedges as closely as possible. The result is a more realistic appearance and greater screening effect. What's more, in addition to the quality that has been proven over the years, recycled materials have been incorporated into the raw material.

## **Characteristics**

Material : PVC + green plastic-coated wire Finish : folded ends Height : Real and exact height Number of lines : 38 rods per metre Weight : +/-1,2kg/m<sup>2</sup> Colours : light green, dark green, brown Sheet thickness : +/- 60 microns Recycled material : +/-50 % Packaging : PP mesh UV treatment : Yes Patent pending
