

GREEN VIGO 30 mm

Natural-looking, durable artificial grass for home and professional use

The dense, bright green fibers of Green Vigo 30 mm artificial grass create the effect of natural grass, while offering a durable and practical solution. Its fine, 'Ω'-shaped fiber shape provides a realistic look and a pleasant touch. Perfect for outdoor coverings, terraces, gardens or events.

Benefits

- Natural look with bright green hues.
- Dense and soft fibers for maximum comfort.
- Timeless and durable structure.
- Low maintenance.
- UV-resistant design for long-lasting color retention.
- Ideal for gardens, terraces, exhibitions, but also for decorating offices.
- Long, 8-year warranty.
- Double back for maximum resistance.

Characteristics

- Stitch count: 13.650/m² (± 100)
- Fiber shape: Omega - New in stock
- Total weight: 2.023 g/m² (± 3%)
- Number of cross stitches per 10 cm: 13/10
- Colour: 2 green + 2 brown
- UV resistant: Yes
- Double backing: Yes
- Warranty: 8 years

TIPS FOR INSTALLATION:

- After rolling out the grass, allow it to rest for at least 24 hours before starting installation.
- After installation, sweep the grass occasionally, depending on use.
- For better results, use a special artificial grass brush, such as the Nortene BRUSHY model.
- A conventional vacuum cleaner can be used to remove dust, sand or other small debris from the grass.
- It is not recommended to install artificial grass in areas where glass or metal surfaces receive direct sunlight.
- Sunlight reflecting off glass can cause high temperatures and can burn the artificial grass

due to the magnifying effect.
