

GROWING KIT Mini-green house for seedlings (PET)

Growing Kit Nortene, consisting of 30 or 36 pots depending on the model, is a very effective way to grow vegetable seedlings. Additionally, the 100% biodegradable tray is made from wood fibers and can be cut. Then, you can simply plant the seedling and the pot directly into the soil.

Benefits

Ref.

Allows the sowing of vegetable or flower seedlings under optimal conditions. 100% biodegradable tray.

Characteristics

Color

Tray made from wood fiber sourced from French forests. Put special seedling compost in the pots. Sow the seeds. Water and place the greenhouse in a bright and warm location. Ventilate regularly.
