Decorative solar owls

It is at night that this owl will be most visible in your garden. Its large bright eyes will show everyone where it is! During the day, it will sleep and use this time to stock up with solar energy.

Benefits

Decorative solar owls to place in the heart of the garden, on the patio or on the balcony. Decorative and highly aesthetic in the daytime, their eyes light up when night falls. 4 models, grey-beige colours, with pretty moulded decorations and nicely finished. They work thanks to the solar collector fitted into the back of their heads.

Characteristics

Polyresin and plastic. 2 white LEDs. 30 x 30 mm solar panel Rechargeable battery 1.2 V - 200 mAh Ni-MH. On / off switch. Around 6 to 8 hours of operation.
